Montgomery/Willems: BECAUSE

Supplemental files and technical info

Please find included the following files:

- Because - Run Sheet.pdf
- Because - Blocking Book.pdf
- Because - Piano Vocal Score with SM Qs.pdf
- Because - Projections Cues For Future Use.pdf

Licensee has permission to print and reproduce these files subject to the “ELECTRONIC MATERIALS” section of the Agreement.

Please find included the QLab bundle and linked assets in a “Because - QLab and assets” folder:

- Because_FINAL.qlab4
- Folder named “video”

“Because_FINAL.qlab4” is the QLab file from which the presentation should be run by the QLab operator.

The “video” folder is where all of the images referenced by the QLab file are found. This folder shouldn't even need to be opened as long as it is always placed in the same folder file structure as the “Because_FINAL.qlab4”. Changing the names could destroy the link between the cues and the images they reference. Just copy the entire “Because - QLab and assets” folder that includes both “Because_FINAL.qlab4” and the folder named “video” to the desired location on your computer and open the QLab file from there.

Below is a link from QLab that explains how this works:

<https://qlab.app/tutorials/how-to-move-workspaces/>

Please note:

1. The QLab operator will need to have a video license (rental or perpetual), because a video license is required to play back some of the custom video effects that were used in this project. (“geometry”)
2. The QLab operator may need to replace their video surface in **Preferences > Video > Video Surfaces > Replace screen.**
